Local Economic Service Providers Network

Catalogue

INTRODUCTION

Globalization, turbulent environment, specialization and a series of other factors create an urge with companies to use services of professional consultants. The world's top companies use more consulting services than the average or less good ones. Consulting profession is now so developed and has its form, rules of engagement and codex of conduct and consulting agencies and independent consultants are merging into state, regional and global associations.

Merging of consulting companies and individuals into consulting associations has a series of positive effects of which networking and capability of offering complete consulting services in large and complicated projects are the most important ones.

Consultants gathered around associations could offer all types of consulting services starting from creation of strategies, feasibility studies, development and establishment of organizations, research services, selection of technologies, assistance in human resources management, etc.

LOCAL ECONOMIC SERVICE PROVIDERS NETWORK - LESPnet, gathering consultants from the whole of Bosnia and Herzegovina, has been created as an exact result of mentioned trends in consulting business, as well as above-mentioned advantages.

The main goal of merging of consulting companies and independent consultants into such professional association is to improve the quality of consulting services through the establishment of a system of certification of the LESPnet association members for certain consulting businesses. This ensures a guarantee to the consumers of consulting services for the LESPnet members' expertise and qualification for providing certain type of services.

On the other hand, this also sets an obligation before the LESPnet association to create an educational program, rules of engagement and codex of professional conduct, as well as specialist exams, that all members of the LESPnet association should pass. It also needs to monitor constantly the quality of provided consulting services in order to be able to react with discipline measures against those members breaching the rules of engagement, as well as to be capable of protecting interests of the consumers of consulting services, of consulting profession itself and of other members of the LESPnet.

Best Regards,

LESPnet Manager
EDIN ALIĆ

GENERAL INFORMATION ABOUT LOCAL ECONOMIC SERVICE PROVIDERS NETWORK (LESPNET)

Local Economic Service Providers Network - LESPnet is an association of consultants in Bosnia and Herzegovina, founded with the assistance of the European Union's Qif program, which is implemented by the CARE International BH/C. An inaugural assembly of the association Local Economic Service Providers Network - LESPnet was held on September 10, 2001 at the Mt Jahorina in the presence of 54 agencies providing business-consulting services in Bosnia and Herzegovina and it was officially registered with the Ministry for Civil Affairs and Communications on September 9, 2002.

A management board voted in by the association's assembly is managing the "Local Economic Service Providers Network - LESPnet". The association assembly consists of one representative of each association member. The management is made of director/LESPnet Coordinator for BiH.

Local Economic Service Providers Network - LESPnet is a non-profit organization reinvesting achieved profit into accomplishment of the association's goals. LESPnet finances its activities through membership fees, implementation of various projects and donations. Due to its unique regional characteristics and a need for more direct and faster contacts with potential consumers of consulting services across Bosnia and Herzegovina, the Local Economic Service Providers Network - LESPnet, is organized at two levels, the regional and the state one. The work on the ground is done by five regional coordinators managed by LESPnet Director/Coordinator for Bosnia and Herzegovina in Sarajevo where the association is seated.

Its members, providing business-consulting services in various business sectors, and the LESPnet personnel, represent the LESPnet professional capacities.

Today LESPnet gathers 53 registered members employing over 80 highly educated economic and technical staff.

LESPnet aims to become a synonym for quality in the sector of business-consulting services by applying top world expertise and practice in the sector of consulting and training of the LESPnet members, as well as by establishing a system of quality for the network members.

In order to ensure quality of work and to protect consumers of consulting services we have adopted:

- Rules of engagement for the LESPnet members
- LESPnet members' codex of professional conduct. (in accordance with the FEACO codex)

According to adopted *Regulations on grades of promotion program and way of passing professional exam for LESPnet members in order to achieve a higher grade in quality of consultant*, the association has made a classification of its members to:

- Trainee Consultant
- Consultant
- Senior Consultant
- Leader Consultant
- Trainer Consultant

The classification of LESPnet members into one of above-mentioned categories is done on a basis of following criteria:

- Education,
- Experience in consulting business,
- Consulting service percentage share in annual income of the member
- References and appraisals.

LESPnet has adopted a principle of a constant advance training which defines a minimum number of hours per year for personal professional advancement of the LESPnet members, which is a pre-condition for maintaining the grade of quality of each LESPnet member.

MINIMUM HOURS REQUIRED FOR PERSONAL PROFESSIONAL ADVANCEMENT			
Grade of quality	Organised by LESPnet	Other organizations	Total
Trainee Consultant	-	-	-
Consultant	35	35	70
Senior Consultant	25	25	50
Leader Consultant	20	20	40
Trainer Consultant	-	-	-

Through its education program for members of the LESPnet, rules of engagement of LESPnet members and codex of professional conduct, LESPnet aims to provide the best consulting expertise and practice in order to raise work professionalism and quality of legal consulting services to the top level.

By providing top quality service, LESPnet also aims to support development of private and public sector, the creation of new jobs and thus help reduce poverty and unemployment in the country. LESPnet strives to connect with networks linking the local market with markets abroad in order to help develop business relations between local and international companies.

SERVICES PROVIDED TO CLIENTS BY LESPNET MEMBERS INCLUDE:

- Strategic planning,
- Leadership,
- Human resources management,
- Stock management,
